

Professional Development Day

On November 26, Kane School District teachers received professional development training from SUU professors Dr. McKenzie and Dr. Kramer on trauma informed problem solving and Adverse Childhood Experiences (ACEs) research. We appreciate the partnership with SUU and the Kane School District in student interventions and cognitive development. Teachers and coaches from the district also received first aid, CPR and AED training from our local EMTs, and will receive their CPR certification card from the Red Cross. We would like to thank our local paramedics for providing the training to our faculty and staff. As a district we will continue to provide training for our teachers to better prepare them to respond in the event of an emergency and work to provide the needed intervention to students who are experiencing trauma.

Ben Dalton
Superintendent
Kane School District
