Utah is one of the fastest growing tech hubs in the US, ranking second in the nation for states with the fastest tech job growth. The greatest demand is for Web Software Engineers with coding skills.

A college degree is not required. Employers are looking for candidates who can demonstrate strong coding skills, coding portfolios, industry certifications and internships.

Programming & Software Development Pathway

Computer Programming I

Learn to code

Build a strong foundation in Python, one of the world's most popular coding languages used in industry for web and game development, machine learning, AI, and cybersecurity.

Develop a portfolio

Code animations, games, apps and other interactive programs as you develop a portfolio of engaging software projects.

Earn industry certifications

Demonstrate your coding knowledge by earning industry certifications that employers are looking for.

Discover your creativity

Express your creativity by designing and coding anything you can imagine. Solve real world problems through code by engineering creative solutions.

Utah Codes

Utah Codes is a state-wide initiative to provide the opportunity for all students to learn to code and prepare to compete for these high-paying, high-demand software development jobs after graduation.
